CIS 195 - Internet Programming Essentials

4 Credit Hours

Students create a variety of multi-page Web sites using Hypertext Markup Language (HTML), XHTML and Cascading Style Sheets (CSS) while expanding their knowledge of the Internet, Web and HTML-based development. Additional topics include Web page layout using tables, frames, and style sheets; working with images, image maps and slicers; and learning how key technologies such as JavaScript, dynamic HTML, and XML are integrated with HTML web pages.
